

The BA degree in Earth and Environmental Studies requires the following major courses (54 credits):

Core required courses (26 credits)

GLG 108 Water Planet (4)
GLG 110 Dangerous World (3) and GLG 111 Dangerous World Laboratory (1)
SES 220 Biology of a Changing Earth (3)
SES 225 Global Biogeochemical Cycles (3)
GLG 305 Dynamic Earth (3)
GLG 325 Oceanography (3)
GLG 327 Earth's Critical Zone (3)
GLG 464 Solving Environmental Problems (3)

Supporting Mathematics and Related Science Courses (13 credits minimum)

- MAT 170 Precalculus (3) OR MAT 210 Brief Calculus (3) OR MAT 251 Calculus for Life Sciences (3) OR MAT 265 Calculus for Engineers I (3) OR MAT 270 Calculus with Analytic Geometry I (4)
- CHM 101 Introductory Chem (4) OR CHM 107 Chemistry and Society (3) AND CHM 108 Chemistry and Society Lab (1) OR CHM 113 General Chemistry I (4) OR CHM 114 Gen Chem for Engineers (4)
- GIS 205 Geographic Information Science I (3)
- STP 226 Elements of Statistics OR STP 231 Statistics for Life Science (3) OR GIS 270 Statistics for Geography and Planning (3)

Upper Division Electives (15 credits)

- Students must take at least 5 upper division elective classes (3 credits each).
- At least 2 of the 5 courses (6 credits) need to be 400-level classes.
- The List of Pre-approved Upper-Division Electives is available on the [Undergraduate Forms and Resources page](#) of the SESE website (click "Major Course Planning Sheets" and scroll down to the section for the BA in Earth & Environmental Studies).

Important Notes:

- Students must receive a grade of "C" or better in all of the above courses in order for them to count toward the major.
- The major map represents the official catalog for the degree.
- Substitutions for any of the requirements above must be pre-approved by a SESE advisor and/or the SESE Undergraduate Committee. Students must notify their advisor if substitutions are not noted on the DARS correctly.
- Students must complete a second language as part of the BA degree (through level 202).
- This degree can be completed with the minimum supporting mathematics and related science courses specified above, but students who want to take a more "science intensive" approach to the program are able to do so. This flexible degree leaves ample room for completing additional courses if needed.
